Jan. 26, 1989

The patent discloses a medical plaster for the application of local ointment, cream or powder to certain parts of the human body. The plaster consists of an application layer and carrier layer. The application layer has a shallow cup shaped recess in which the ointment, cream or powder can be distributed at the exact prescribed rate and which consists of a thermolabile material such as gelatin, peptin or carboxymethyl cellulose. The carrier layer is preferably made from a material which is impermeable to oxygen or has a defined permeability to oxygen and water vapor.

Should anything further be required, a telephone call to the undersigned, at (312) 226-1818, is respectfully invited.

Respectfully submitted,

FACTOR & PARTNERS, LLC
